FGIS *online*

# QAC – GSL Enhancement

---

- ▶ When QAC was first planned, the Grading Services Laboratory (GSL) was going to supervise all official agencies. However, by the time QAC came online, GSL didn't have the space or personnel to supervise all official agencies.
- ▶ The GSL enhancement was created as a bridge to allow the F/O QAS to enter SIMS supervision results into QAC for samples from their Official Agencies that have the jurisdiction of "National".
- ▶ The F/O QAS that supervise official agencies will be assigned the identities of OSP QAS & GSL in GAS.
- ▶ STEPs and Opinions with National jurisdiction (including all from the official agency QAS) will be forwarded to the BAR. \*\*
- ▶ National Grain Center (NGC) must use Create Flagged SIMS Profile to select SIMS samples to be supervised by GSL/BAR, cannot use Create Targeted SIMS (which have jurisdiction of Local and will stay at Field Office).

# The Enhancement (Summary)

- ▶ The enhancement will allow FO QASs the ability to:
  - ▶ Supervise and enter **national** SIMS samples into QAC by official agencies/service points in their circuit.
  - ▶ Correct and enter corrective actions that were sent back to official agencies/service points in their circuit.
  - ▶ Correct and enter OTS of sample from official agencies/service points in their circuit.
  - ▶ STEPS will continue to come to the BAR. **\*\*** Due to limited BAR personnel and QMP agreements - QASs may enter Official Agency STEPS as OTS.
  - ▶ Opinions – if elevated past the local OSP QAS - would come to the BAR.
  - ▶ Referees & Surveys would remain either local OSP only or national and initiated by BAR/QADB.
